# ACCESSORIES & DESIGN FLOORS

---

Creating an individual and stylish space is now even easier:

Our flooring collections can be easily adapted in a number of ways, from simply laying two designs from our LOC collection side by side, to cutting your chosen LVT tiles into different shapes or using inlay accessories.

## LAY DIFFERENT DESIGNS TOGETHER

Sometimes it's the simplicity of a flooring design that can really enhance a whole interior. Try laying a wood and stone together to create zones, or just mix up shades for an eye catching look.

## USING INLAY ACCESSORIES AND BORDERS

We have four types of inlay strips, available in 18 colours that have been designed specifically to complement every shade in our LVT collections.

Please note: inlay strips and borders cannot be used with our LOC or LVS collections.

### Marquetry Strips

These strips are ideal for laying between wood planks to create designs from ships decking, perimeter borders or just for highlighting a room feature such as a fireplace or island.

### Grouting Strips

Typically laid between stone tiles, grouting strips can be utilised to bring an authentic touch to your interior. Versatile in nature they can be used as a subtle close-to-tile colour addition to your floor or you can select a contrasting colour to create a highlighting effect.

## Feature Strips

These strips bring a bold look to both planks and tiles. Used to create a feature or a more unique highlight feature strips can offset a whole room.
